Experience

2019-now **Software Engineer** Cleanshelf / LeanIX

My team was responsible for the direct integration of SaaS applications (web applications with subscriptions) in order to collect invoices, members data and data indicating the usage of the SaaS services.

Most of the work was done in JavaScript. The other languages used were Python, Go and SQL.

My work included:

- Implemented and maintained over 100 of direct integrations with SaaS applications using both API and scraping
- Maintained our 'AI' system (PDF to text and regex) for getting invoices data from PDFs
- Implemented and maintained internal tools for our team

Education

2020 **Business Informatics (Masters)** Faculty of Economics, University of Ljubljana

My thesis was titled "Deljenje objav o potencialnih delodajalcih na družbenih medijih: konceptualni model in empirična preverba" [Sharing Posts about Potential Employers on Social Media: A Conceptual model and an Empirical Examination]

I spent two semesters (one in Leipzig, German, another in Vienna, Austria) and one internship (Eger, Hungary) abroad.

unfinished **Cognitive Science (Masters)** Faculty of Education, University of Ljubljana

I spent one semester abroad (Bratislava, Slovak). Some of my course was also done in Vienna.

Conference presentations

2020 **Informacijska družba 2020**
What Anime to Watch Next? The Effect of Personality on Anime Genre Selection

2019 **PyCon Balkan 2019**
Topic Modeling: All Mistakes I Did, so You Don't Have To.

2019 **MeiCogSci Conference 2019**
